Methods of Photography in Al Ain University

Photography has its unique language, techniques and aesthetic merits, however, its effectiveness is dependent on the creative vision and ability to employ innovative and rational exploitation of the concept.

Purposely, the Deanship of Students Affairs in the Al Ain University of Science and Technology, based in Al Ain, held a workshop entitled "Introduction to Photography" presented by Dr. Louay Al Naji, a faculty member in the College of Business Administration, in the presence of a number of academic and administrative bodies and university students.

Throughout the lecture, Dr. Louay highlighted the basic photography skills and how to handle and use different cameras. He also talked about the types and uses of lenses with examples of each, as among the most important methods to control lighting and measuring light intensity before taking any image which is one of the most important secrets of successful photography. He even displayed a collection of wonderful photographs taken by himself in different places of the world.

And for their part, the audience expressed their enjoyment and gratitude for this wonderful lecture.
