AAU Signs an MOU With the Statistics Center Abu Dhabi

Believing in the need of interacting with the community to raise the effectiveness of academic education and link it with the labor market, the Statistics Center Abu Dhabi signed a memorandum of understanding with Al Ain University of Science and Technology in order to enhance cooperation between the two sides in the field of statistical work and to promote statistical awareness among students of educational institutions and other related works.

The MOU was signed by HE Butti Ahmed Mohammed bin Butti Al Qubaisi - Director General of Statistics Center and Dr. Noor El Deen Atatreh – AAU Chancellor, the two sides identified the cooperation areas in developing student's abilities through the training programs, lectures and other awareness meetings offered by the Statistical Training Institute, exchange all scientific works organized by the university in the statistical fields such as researches, conferences and workshops, in addition by receiving the Statistics Center staffs to introduce the center and its activities, regulations and laws to the university's students.

The MOU also pointed in providing students with training opportunities, cooperating in the scientific researches, participate in the innovation laboratories and placement the Director of the Statistical Training Institute as a member of the Advisory Board for the College of Business.

The memorandum also pointed that the two parties' commitment is to respect the intellectual and private or property rights of the other party and to keep the mutual statistics and information confidential.

Under the terms of the memorandum of understanding, the two sides will work during the coming period to coordinate the joint works and efforts to study and discuss the best mechanisms for implementing the provisions of the MOU and ensure to achieve all the desired benefits for both sides.
