MBA Students visit the Emirates Palace

The College of Business at Al Ain University of Science and Technology, Abu Dhabi Campus, organized a visit to the Emirates Palace for the students of MIS in the MBA program, under the supervision of Dr. Ahmad Ghandour.

The main objective behind the visit was to enhance the students' practical stimulation and let them have an overview of the activities related to information systems carried out by the Emirates Palace.

The visit was welcomed by the GM where an orientation of the Emirates Palace was given by the Deputy Manager followed by an in depth presentation on Information systems used in the palace delivered by the IT/AV Director.

Students of MIS “read and learned” about the information systems in the Palace through a case study. This visit gave the opportunity for the students to have practical edge not only to “see and know” and get the real feel of how company utilize systems but also to transfer the theoretical knowledge to practical implication.
