A Student visit to Abu Dhabi Media City

In cooperation with the Deanship of Student Affairs, the College of Communication and Media at Al Ain University's Abu Dhabi Campus organized a student visit to Abu Dhabi Media City on World Radio Day.

During the visit, students and academic staff were given a tour of the center's departments and facilities. They learned about the work environment, best practices, modern technologies, and systems used in the media field. The students were also able to view what radio stations operating under Abu Dhabi Media City offer and became familiar with the mechanisms of using radio tools by entering the radio facilities, visiting the archives, and implementing a practical application in one of the recording studios. They were also introduced to the tools used by the director of radio programs to produce information materials for dissemination via radio space.

The main objective of the visit was to facilitate the student's understanding of the original curricula and expand their practical applications. The students expressed their happiness about everything they learned during this visit.
