Al Ain University and the Department of Energy: The Power of Innovation for Change

In a meeting that reflects a shared commitment to innovation and sustainability, Dr. Noor Aldeen Atatreh, Deputy Chairman of the Board of Trustees, met with H.E. Eng. Ahmed Mohamed Al Rumaithi, Undersecretary of the Department of Energy in Abu Dhabi, along with several executives from the department, to outline a new collaboration between Al Ain University and the Department of Energy.

The meeting focused on enhancing relations between the university and the department through organizing events, workshops, and professional training programs, as well as fostering the skills required in the workplace. Additionally, it aimed to strengthen the "Energy Ambassadors" program, which carries the torch of change by promoting community awareness and energy conservation.

The meeting sought to unite efforts toward sustainability and to establish effective

communication bridges between academic institutions and the energy sector, creating an informed and responsible environment for the future.

Dr. Noor Aldeen Atatreh, Deputy Chairman of the Board of Trustees, stated:

"Al Ain University reaffirms its steadfast commitment to fostering partnerships with leading institutions like the Department of Energy to achieve innovation and sustainability. This collaboration is part of our vision to equip future generations with the knowledge and skills needed to leave a positive and lasting impact on the energy sector and society as a whole. We are proud of this meeting, which reflects the university's dedication to supporting national initiatives to enhance community awareness and achieve sustainability goals. Through this partnership, we aim to establish effective channels between academia and the energy sector to prepare qualified talents capable of addressing future challenges and contributing to building a sustainable future."
