

Al Ain University

Information Technology Center > Vision and Mission

Vision

The vision of the Information Technology Center is to become a leader in the field of university IT service providers in the United Arab Emirates and fulfill our mission in the most productive manner possible while adapting with the latest technology standards and best practices and also make sure that IT services, policies and procedures are fully communicated and consistently enforced in order to realize maximum acceptance from the university's community.

Mission

The mission of the Information Technology Center is to promote and support the university's effective use of Information Technology, our goals are well-aligned with the objectives of the university, and we serve students, faculty, administrators, staff, and other campus residents. The IT Center implements, provides, and maintains IT services for the university while enhancing the performance, defending against cyberthreats and utilizing available resources to help other centers and departments achieve their goals using IT services that have full autonomy, high-availability, excellent performance, and tight security.
